DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 31-52 and 58, drawn to a frame movable by means of rollers and rails supporting the frame element and found in class 101, subclass 480.

Group 2, claim(s) 53-57, drawn to a toothed rack attached to a movable frame and a self-locking drive mechanism engageable with said toothed rack and capable of moving in and out of engagement with the toothed rack and found in class 101, subclass 480.

2. The inventions listed as Groups 1 and 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 is drawn towards a cylinder and rollers for moving a frame element in a printing press. Group 2 is instead drawn towards a toothed rack attached to a movable frame element and a self-locking drive which engages to move in and out of engagement with the toothed rack.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their lack of

unity in lacking the same or corresponding special technical features, restriction for examination purposes as indicated is proper.

3. No phone call was made to applicant's attorney as the examiner believes that applicant's attorney will not elect over the phone.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
